19	20	21	22	23 10am – 360 Friday
26	27	28	29	30 10am – AR Friday 10am – Formatting Papers & Documents

Register for our Student Success Workshops to develop your skills, or contact us to book one-on-one training on a specific technology-related topic.

**3D Fridays** – Come check out tools to scan, view and print objects in 3D. This technology can be used for prototyping products and models. Come check out a project prototype, wildlife specimens and a bison skull model.

**VR Fridays** – Study for your anatomy exam, use the virtual makerspace to build a prototype, learn how VR can be used to build empathy and more.

**360 Fridays** – See how programs at Lethbridge College are using 360 video and images. Stand among bison or on top of a wind turbine!

**AR Fridays** – Check out the amazing possibilities for augmented reality. See what the library would look like with hoodoos and palm trees, or hold a beating heart in your hand with a Merge Cube!

Follow us on Twitter for tech tips to make this semester the best yet.

# Student Success Workshops

from the Digital Learning Team

## **Canvas Tips and Tricks for Students**

Learn how to set up your profile and notification preferences, use the Canvas calendar, customize your dashboard, use 'What If' grades and more at this workshop.

## **Computer Cleanup**

Returning to school after several years away? Changing careers and need to get up to speed with technology? This workshop is designed as a quick overview of basic computer navigation, file management, downloading and installing programs, personalization, email navigation and time to answer your questions.

## **Formatting Papers and Documents**

Learn how to harness the power of Microsoft Word or Google Docs to format papers and documents easily.

## **Presentation Tools**

Need to do a presentation in class or for a job interview? Let us show you how to wow them with your mad skills in PowerPoint, Google Slides, Keynote, Canva and Prezi.

## **Online Collaboration Tools**

Bring efficiency to your group project semester with some smart online tools for web conferences and co-authoring. Collaborate in developing documents and presentations without having to set up all those face-to-face meetings.

## **Easy Website Design**

Anyone can build a website! Learn how to build a simple website for your blog, portfolio, or small business... no web design experience required!

***Unless otherwise indicated, workshops are held in the Learning Café Solarium (CE1340E).***
